About Me

I am the **CEO & Founder of NextDev**, a digital solutions agency, and a highly experienced Frontend & Mobile Developer. With a strong track record of delivering **10+ web and mobile projects**, I specialize in building performant, scalable, and beautifully designed applications. My core expertise lies in React, Next.js, React Native, and modern TypeScript ecosystems.

From conceptualizing intuitive UI/UX to deploying full-scale enterprise applications with Firebase and REST APIs, I bring a product-focused mindset to engineering. I build software that not only works flawlessly but provides an exceptional user experience.

Featured Projects

NextDev

Founder & Frontend Developer

Overview

Designed and developed the official company website showcasing software development services, portfolio, and digital solutions. The architecture heavily focuses on performance, responsive design, and modern UI/UX principles.

Responsibilities
